

PETER PEKNY

▪ IT specialist, application administrator

WHO AM I

Currently I am IT application specialist who is already working over 10 years with almost all commonly used IT technology's standards and infrastructure devices. I am employee of Thales Company as application implementation specialist for GSMA and GSMA+ certified applications. M2M and Consumer plus eSIM management.

My responsibilities are to deliver customized M2M and Consumer setup in multitenant installation 24/7 functional environment, setup all necessary applications, requests for other teams to setup infrastructure architecture design of environment. Organize and solving nonstandard requests for customers under time pressure. I think personally, I am team player member and also I like to discuss about possible issues and how to prevent possible problems. I am very focused on results and I have ability to fast learning a new things. I like to meet new people and I am adaptable in teams with multiplatform environments. Personally I would like to participate as DevOps engineer. I like the responsibility, flexibility and philosophy of this "system".
